LOCAL NEWS.

Mr and Mrs Chas. Schultz
and family have gone to Van-
couver.

Mr and Mrs Robt. Winters,
who have resided at Victoria,
B.C., for the past 18 months,
arrived back in Stony last
week, and have taken up their
residence on the old place,
north of town.

Mr Geo. J. Drobe, travel-
ling passenger agent White
Star line and Red Star line,
paid a visit on Monday to
Paul Werner, district agent
for Stony.

After a short visit here
with her sister Mrs Muriel
McKinlay, Miss Emerson left
on Saturday for her home in
Ontario.

Mr Rudely Heichen, the
well known grain man, has
secured a position on the in-
spection staff at the Terminal
elevator, Edmonton.

The girls' club's afternoon
tea and sale of home cooking,
held on Saturday, was a suc-
cess, the affair being well pa-
tronised by friends of the or-
ganisation.

Another gang of well-dig-
gers are trying their hand at
getting fresh supplies of water
on the premises of the Arm-
bruster Lumber Co.

Freighting from the City is
so heavy these days, the Z. &
H. motor trucks are making
two return trips daily.

A meat pedlar from the
City, with a motor truck and
roasts and steaks all ready
cut, has been going the rounds
in this district and town, but
so far he has not met with
much success.

What all too rarely comes
to Stony—a movie picture
show—was given Saturday
night, and a large crowd wit-
nesses the two good pictures
and the comic which were
thrown on the screen.

A delegation from the local
rifle club, headed by Capt. M.
McKinlay, attended the shoot
in Edmonton, Saturday, of
the Northern Alberta Rifle
Ass'n, and put on some good
scores.

Found, auto number plate.

Blaze at Edmonton Beach.

On Thursday afternoon last
fire was discovered on the
Barrie store premises, at Ed-
monton Beach. No person
was on the premises at the
time, the fire being discover-
ed by the occupants of the
Barrie cottage, nearby. Ev-
erything was done to quench
the flames, but without suc-
cess, and the blaze reached
to Mr Barrie's residence.

Part of the stock in the
store was saved, but the build-
ing was a complete loss, as
also was the residence.

When the fire broke out
an urgent phone call was sent
in to Stony for help to fight
the fire, and several motorists
responded, with their cars.
The volunteers gave very ef-
fective aid in preventing the
fire spreading to the adjoining
buildings.

RED ROSE ORANGE PEKOE is extra good.

Opportunities For Britain In Canada

Great Britain has a problem and Canada has a problem, one being the exact opposite of the other. In the British Isles there is a surplus population for which employment cannot be found. In Canada there are enormous resources and vast areas of fertile lands which call for increased population in order that development may take place. The Old Land has too many people; this New Land has too few.

Looking at the face of things it would seem to be a comparatively simple matter for the British and Canadian Governments to evolve policies under which the surplus population of Great Britain could be transferred to the open spaces of Canada, thus solving the problems of both countries. But the solution is not so easy, in fact, it is most complex and difficult.

The class of settlers which Canada wants is the agricultural type; men and women who will go on the land. True, they may not have had actual farming experience to be welcomed and to succeed, but they must be of that class which is likely to make good on the land.

Great Britain, however, has no large surplus of this type. If, indeed, any surplus at all. The British surplus population is found among the workmen, artisan and labor class, men and women who, because they cannot obtain steady employment, are obliged to accept the Government dole. Opportunities for the employment of any large number of these people in Canadian industry are small, and it would be most unfair to them to encourage their immigration to Canada where their presence would have an injurious effect on Canadian workmen and labor and lead to the creation of a Canadian situation not unlike the present one in Great Britain.

The efforts of both the British and Canadian Governments are, therefore, confined to the training of a limited number of immigrants for agricultural pursuits and the proper placing of them on farms in Canada. Welcome as these efforts are, their effect on the respective British and Canadian problems of surplus and insufficient population is almost negligible.

There would seem to be a greater hope of making an effective contribution towards the solution of this joint problem in the adoption of the idea which has been urged of late, namely, that the great captains in British industry establish branch plants in Canada in order to enable them to successfully compete in the growing Canadian market with their United States rivals and that they staff these branch plants with their own workmen from the British Isles.

The general adoption of such a policy would result in profitable investment of British capital, would lead to a marked development of the natural resources of this Dominion, would help to adjust the balance of trade as between Canada and the United States, would add to the population of the Dominion probably employed, would ease the unemployment situation in the Old Land, and would increase the productive capacity, the prosperity and wealth of the Empire as a whole.

It will be frankly admitted that the industrial leaders of Great Britain have had to face enormous difficulties during and since the war. The have borne an even still heavier burden. They may justly feel that the present is not the time to launch out on new and untried ventures. The situation is, however, that only through the adoption of heroic measures will conditions in the Old Land be bettered, and some relief brought to British industry. Furthermore, under existing conditions, British industries are losing out in the Canadian market. An effort should be made to hold and strengthen their position here before it is too late.

It is gratifying to note that one big British concern has decided on a great undertaking in the Province of Quebec, an announcement has just been made that British financial interests, controlling tens of millions of capital have finally concluded arrangements for the utilization of southern Saskatchewan lignite coal in the carbonizing and briquetting of this fuel on a large commercial scale and will within the next few months invest hundreds of thousands of dollars in the enterprise.

Premier Brownlee of Alberta and Hon. Chas. A. Dunning have both been urging the adoption of this branch factory policy upon the British manufacturer, and it is to be hoped that to entice a business man as Premier Stanley Baldwin himself a big manufacturer, will see the advantages to Britain, to Canada, to the Empire, of such a policy, and urge its adoption upon his fellow manufacturers in the British Isles.

Uses 'Plane To Operate Farm

The days when the horse was depended on to conduct the rancher over his domain passed to the era of the automobile a few years ago. And now the auto gives way to the airplane. The pioneer exponent of this trend is Jack Faucher, known as the "flying rancher," because he operates his huge wheat farm near Spokane, Wash., by air.

Manitoba's Minerals

Current activities in the mineral-rich areas in southwestern and northwestern Manitoba indicate that the province will soon become a steady producer of gold and possibly an important source of copper and zinc.

National Dairy Council

Mr. W. F. Stephens, secretary, announces that the ninth annual meeting of the National Dairy Council of Canada will be held at Toronto, on November 21 and 22 next. A number of questions will be up for discussion of interest to dairymen and dairy manufacturers. The programme will be outlined shortly.

The scales used in weighing diamonds are so delicately poised that the weight of a single eyelash will turn the balance.

With a total population of about 100, Leavenworth, a village in Suffolk has eighty bachelors.

Disfiguring Blemishes Healed by Cuticura

Daily use of Cuticura Soap, assisted by Cuticura Ointment when required, not only soothes and heals unsightly and annoying blemishes and irritations on neck and face, but tends to prevent such conditions. Nothing purer, more economical or more satisfactory than these fragrant emollients.

Sample each free by mail. Address: Cuticura Department, 219 West 14th Street, New York, N.Y. 10011. Cuticura Soap 25¢. Cuticura Ointment 25¢.

British-Jap Naval Pact Is Reported

U.S. Informed Secret Agreement Between Nations Has Been Reached
The Washington Post says that word has reached the state department officials from "trustworthy sources" that Great Britain and Japan came to a mutually satisfactory secret understanding regarding future naval supremacy when it finally became apparent the United States would not accept the British program at the recent Geneva conference.

The gist of the secret understanding has not been divulged, the newspaper adds, declaring that it is doubtful if much definite information on its content is available to the officials of the U.S. Government. The newspaper story also says the secret understanding is being discussed behind closed doors by officials here with a view to weighing possible consequences.

On Ladies' Toes Are Sore Corns

Quick safe relief is almost instantaneous if you apply Putnam's Corn Extractor. Slices won't pinch or hurt any more. One single drop of Putnam's stops the pain. A few applications make the corn dry up and drop off. Putnam's Corn Extractor gives satisfaction. It dissolves it every day. Get a bottle from your druggist. Refuse a substitute for Putnam's.

Water Power Development

The present recorded water-power resources of the Dominion will permit of a turbine installation of 41,700,000 horsepower. The total hydraulic installation up to the end of 1927 throughout the Dominion was 4,556,226 horse-power or less than 11 per cent of the recorded water-power resources.

GIRLHOOD DANGERS

Come Through a Weakening Of the Blood—A Tonic Is Needed

In their early teens it is quite common for girls to outgrow their strength, and mothers should carefully watch the health of their daughters at this time. It is when the strength is sapped by rapid growth that anemia develops. The first signs may be noticed by nervousness, languor and headache. The face grows pale, breathlessness and palpitation become apparent, with low spirits and depression.

Neglected anemia often leads to a decline, but if you are that your daughter's blood is enriched, there need be no cause for anxiety. The finest blood-builder ever discovered is Dr. Williams' Pink Pills. They will build up your girl's health and ensure her long and manhood. In proof of this Mrs. George Johnson, Black's Harbor, N.B., says: "I think Dr. Williams' Pink Pills are a wonderful medicine. My daughter, Margaret, was in such a badly run down condition that we feared she was going into a decline. Her face was pale, the least exertion would leave her exhausted. She had no appetite and lost a lot in weight. Up to the time we began giving her Dr. Williams' Pink Pills, no treatment had helped her. But thanks to the use of this medicine she is again well and strong, showing no signs of the trouble that had so weakened her."

In all troubles due to weak, watery blood, Dr. Williams' Pink Pills will be found a reliable remedy. Sold by all medicine dealers or sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Good Crops Along H.B. Line

Grain fields along to those on the prairies were seen at Mile 42, Cormorant Lake, on the Hudson's Bay Railway by J. D. Guild, superintendent of illustration stations for the Dominion experimental farm, who has returned from an inspection trip over the route. He reports that at other points, grain is coming along well except at Mile 81, where cutworms have done considerable damage to vegetables. At Mile 42 there is an excellent stand of flax and pumpkins 15 inches through.

Getting Rid Of Encumbrances

It is related that John Lawrence, who ruled the Punjab nearly 20 years or so ago and who later became Viceroy of India, used to say that when he came across a young Britisher in the India civil service who was encumbered with a wife and a piano, he hustled him about from one jungle station to another till the young man parted first with the wife and then with the piano.

Drives away pain—Minard's Liniment.

W. N. U. 1927

Would Extend Air Mail Service

United States Government Looks Toward Canada As a Field

For Extension

Success of the air mail in the United States has led the government at Washington to look towards Canada as a field for extension of its service. Postmaster-General H. S. New has let it be known that he would welcome applications for air mail service between such points as Minneapolis or St. Paul, Minn., and Winnipeg, Man., where there is a fairly large exchange of mail over a short distance. In fact it is likely that preliminary steps will be taken soon to put in a trial service between these two cities but final action will not be taken until after the international air mail conference in Geneva.

It has been customary for the United States post office to await applications, which usually take the form of petitions, signed by a considerable number of people before establishing new air mail routes. A guarantee of about \$15,000 worth of business on any route is generally considered reasonable to justify opening a route.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

Speaks Several Languages

Secretary Of State For The Dominions Finest Linguist In British Cabinet

Mr. J. C. M. S. Amery, the Secretary of State for the Dominions, is unquestionably the finest linguist in the present British Cabinet. He speaks several Oriental dialects as well as European languages.

When in Salonica, Sir George Milne, or "Uncle George" as the G. in C. was invariably called, asked one of his staff officers if he understood modern Greek. The officer replied that he did not, but that he had a good handbook on Greek and also that he knew a man who was supposed to be quick in picking up languages.

So Captain Amery was sent for and presented with the handbook. "Can you get the hang of it by next week?" asked Sir George. "Oh, certainly," was the reply. "You seem very confident," said Sir George. "Well, you see, I wrote it," replied Captain Amery.

Minard's Liniment relieves backache

The White Pine in Canada

The botanical range of the white pine in Canada extends from the Atlantic ocean to the province of Manitoba. It is confined to the region lying south of a line running approximately from the southeast corner of Lake Winnipeg, through Lake Nipigon, along the height of land north of Lake Timiskaming, through Lake St. John to Point de Meis on the St. Lawrence and Cape Breton Island.

Genuine

A Valuable Hen

An offer of \$1,000 for the famous hen No. 6 or \$3,000 for a pen of ten birds including this world record layer was turned down by the University of British Columbia on account of the great value of the bird for breeding purposes.

Babies Cry For "Castoria"

Prepared Especially for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years as a pleasant, harmless substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrup. Contains no narcotics. Proven directions are on each package. Physicians everywhere recommend it. The genuine bears signature of

Chas. H. Fletcher.

Japanese Like Watermelon

Eight pound watermelons cost about 5 cents apiece in Japan and the fruit is becoming a favorite. Although out of reach of the ordinary people in Japan, melons from Yamato and Shizuoka find ready sale in Tokyo, where almost three hundred tons have been consumed this season.

Nights of Agony come in the train of asthma. The victim cannot lie down, and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. J. D. Kellogg's Asthma Remedy. It banishes the frightful conditions, clears the passages, and enables the afflicted one to again sleep as soundly and restfully as a child, fast on the genuine at your nearby druggist.

Candles For Fifty Years

As Inspection of the Caucasian Railway storehouse at Tiflis, Georgia, has disclosed that there are in stock candles enough to supply the needs of the railway for the next fifty years. Electricity is regarded as too radical for immediate adoption.

Internally and Externally it is Good. The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many conditions as well as externally. For some throat, croup, whooping cough, pains in the chest, colds and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

About four inches in fifteen minutes the speed of the speedster bacteria.

It is her heart is in the right place it matters not whether a woman is younger or older than she looks.

Newsprint Industry Expanding In Manitoba When a Second Big Paper Mill Is Mooted

The newsprint industry has long been established and rapidly expanded in all eastern provinces. It is expanding up and along the Hudson's Bay Railway. Now the forests of the prairie provinces are being called upon to furnish raw material for newsprint demands.

One of the most outstanding recent items of interest in the Canadian newsprint is the application before the Federal Government for a pulpwood berth on the Nelson River in Manitoba, capable of supplying a newsprint mill of 400 tons per day.

This lies contiguous to the Hudson's Bay Railway, being between the Nelson River and Lake Winnipeg, and is the second berth sought in the province of Manitoba. The Manitoba Paper Company already has obtained a berth with 6,000,000 cords of wood on the east side of Lake Winnipeg, and has built a mill at Pine Falls, with a capacity of 300 tons per day, described as the largest enterprise in the province.

A 400-ton per-day mill, according to experts, will require a berth containing at least 8,000,000 cords of pulpwood. Power for the mill will be obtained from White Mud Falls on the Nelson River, one of the greatest power sites in the Dominion. An option on these falls, it is understood, has been secured by the financial group behind the new pulpwood application. The falls are, in fact, capable of furnishing a great deal more power than the mill will need, and this is expected to be utilized by the growing mining area north and east, and thus further Manitoba's mining development at the same time.

The foundation of a second newsprint mill in Manitoba would mean a great deal to the province not only in its intrinsic but also tributary activity. A 400-ton mill would necessitate an outlay of about \$8,000,000, and the development of White Mud Falls would require considerable additional capital. The mill would find employment for two thousand men, and apparently surpass in volume of output any of Manitoba's present industrial enterprises.

This projection draws further forcible attention to the timber possibilities of the Prairie Provinces, which in this respect belie their name. "The lumber industry has long thrived in all three provinces and its production goes no inconsiderable way to meet domestic requirements. The newsprint industry is rapidly going to them. Manitoba is about 70 per cent wooded, and the province has been estimated to contain 1,520,000 feet of saw timber, 4,000,000 B.M. In the sister province of Saskatchewan the area actually timbered with merchantable trees is about 750,000 acres. The Province of Alberta is estimated to contain about 21,000,000 feet of saw timber. Altogether the Prairie Provinces contain about 8,000,000 acres of commercial timber lands, and there are in addition large resources of pulpwood upon which no really accurate estimate has been made.

Opening Of The Canadian Rockies To Motorists

Among the long-closed regions of wonder and romance into which a way has at last been found are the Canadian Rockies. Each year the door opens a little farther, until now a good part of the most beautiful scenery of these glorious ranges is within the motorist's reach. The opening this year of The Kicking Horse Trail, linking up Yoho National Park by motor with the outside world, marks the fulfillment of one more daring engineering conception.

Cafe Has New Idea

There is a roadside cafe near Pomoná, Calif., that offers a new wrinkle in entertainment. The patron who wants a fish dinner and is willing to wait for it is supplied with a pole, line and fly and allowed to catch his own in a small brook that is kept heavily stocked with hungry trout. While the fish are being prepared, he may enjoy a walk through the small farm that is operated in connection with the cafe.

A City Beautiful in the West

There is general impression when the Canadian West and the prairies are mentioned, of a country, flat and uninteresting, covered with miles of wheat in the summer, but otherwise of little aesthetic appeal. When a man stands in this country, he is pictured as the centre point of a circle that stretches without a break of tree, shrub or hill, to the horizon, but the advent of settlers has very

considerably changed what may have been largely true some fifty years ago. The cities that have sprung up—some of them almost overnight—in consequence of the prosperity of the West, have been designed and built with a view to beauty and the above pictures of parks in Medicine Hat, Alberta, amply bear out this claim. They represent oases of woodland shade in the middle of

Agricultural Possibilities Of Hudson Bay Railway Belt Are Now Being Determined

Live Stock Totals

More Horses in Canada in 1926 Than in Previous Years

It is interesting to note from the very comprehensive report of the Director of the Experimental Farm System of Canada for the year ending March 31st, 1927, that the rapid progress of motive power has not made any material difference during the last five years in the number of horses in the country. As a matter of fact there appears to have been more horses in Canada in 1926 than there were last year or in 1923, but in 1922 and 1924 the totals ran somewhat higher. Milk cows show an increase in 1926 over every other year, but other cattle show a decrease, the difference between 1922 and last year being no less than 766,150. Sheep show an increase in 1927 over the three preceding years, although fewer than in 1922. Swine are greater in number than in any other year excepting only 1924.

Alberta's Coal Wealth

Greater Than All Known Coal Deposits in Rest Of British Empire

Alberta's potential coal wealth is greater than all the known coal deposits in the rest of the British Empire put together. Sir Thomas Holland, chairman of the Empire Mining and Metallurgical Council, stated at Montreal previous to sailing for home.

"If the present endeavors to change coal into fuel had been capable of displacing petroleum and all its products are successful, the advantage of the United States in having the richest oil deposits in the world will be killed, and Canada will take the place of the United States as the world's provider of liquid fuel," Sir Thomas said.

Fry Distribution in Manitoba

The Department of Marine and Fisheries announces a distribution of over 72,000,000 whitefish fry from their hatchery at Winnipegosis, Manitoba. This is an increase of more than 21 per cent over last year's figures. The fry were all planted out in good condition on suitable grounds in the lake over a wider area than in any previous year, some of the fry being taken as far north as Winnipegosis Island in the northern portion of lake Winnipegosis.

The Dominion of Canada was formed in 1867. Today there are sixty-seven languages spoken in the Dominion.

The recent decisions with respect to the completion of the Hudson Bay Railway has led to a number of statements respecting the resources of the territory through which the railway passes and of the country adjacent to it. Very little has been said, however, as to the possibilities for agriculture, but the Federal Department of Agriculture has thought sufficient of the possibilities to recently establish some experimental plots along the line of the railway. Regarding the soil conditions, a report published a couple of years ago by the Natural Resources Intelligence Service, on the general resources of the region, may be of interest in this connection.

It cannot be said, states the report, that the agricultural future of the country has been accurately determined as yet, despite the fact that success has been met in a small way. At the same time prospects are by no means discouraging. The extent of arable soils is known to be considerable; rainfall is sufficient and well timed; and summer temperatures as recorded at The Pas and Norway House are exceedingly favorable to fast growth and early maturity of field crops. As far north as Split Lake the natural flora of the well drained areas are practically identical with that of similar ground in the Riding Mountains 400 miles south-west from Split Lake. Some indication of the relative surface conditions prevailing in the belt may be obtained by examining a cross-section of the country from The Pas northeast towards Nelson for approximately 350 miles as represented by an examination of lands adjoining the railway.

Type	Per-	centage
Swamp soils	185	8
Boulder clay	27	8
Lake clay	105	29
Beach sand	3 1/2	1
Bedrock outcrop	28	6
Total	348 1/2	100

Soil surveys of this latest agricultural belt have not been attempted except reconnaissance examinations on a limited scale. It has been estimated that a large belt of about 10,000 square miles, the greater part of which lies between the Churchill and Nelson rivers north of mile 120 (H. B. Ry.) and of which 50 to 75 per cent is arable soil, could be made available for mixed farming. This central belt is composed of old interior lake beds whose even textured loessitic clays have filled the valleys and transformed a broken country into one of more even and undulating topography. The clays are as much as 100 feet deep in places. The soils are all drift material excepting the swamp soils. Ordinarily there is little surface cover as distinct from the subsoil which is low in organic content. Five to twelve inches below the shallow surface of decayed leaves and vegetation the clay is found, brown in color from its association with the decayed matter, and quite friable. The swamp deposits on the other hand are composed for the most part of organic material consisting of layers of mosses and other vegetable matter which in the north especially shows little evidence of decomposition or alteration, due largely to the ground-ice or cold ground-water which prevents oxidation. Much of the clay land is muskeg covered and poorly drained, but these are difficulties which should be overcome with time and forethought and at no great expense. The rainfall is not heavy, the forest cover mostly light and the surface free from boulders, so that little difficulty should be met in draining, clearing or bringing the ground under cultivation.

Copper Deposits in Canada

Copper ores of various kinds, including the native metal are found at many places throughout Canada. Production has so far been confined to the following areas in order of their importance: British Columbia, Ontario, Quebec, Manitoba, and Yukon. Deposits of copper ores are also known in the Maritime Provinces, and in the Arctic regions of Canada. The Arctic deposits, although at present inaccessible, possibly constitute one of the great copper-ore reserves of the future.

The first tax cab appeared in the streets of Jerusalem recently. It cost a vast amount of curiosity.

An invitation to visit China to promote aviation has been extended to Col. Charles A. Lindbergh. New York's Paris fair. Lindbergh's said he might accept.

More and better immigration for Canada is the prospect for 1928. W. J. Egan, deputy minister of immigration, declared on his return from a European tour that lasted more than three months.

Vicount Cecil, of Chelwood, has definitely resigned his cabinet post as chancellor of the Duchy of Lancaster, and will not go to Geneva for the meeting of the League of Nations Assembly.

Arthur Joseph Noel, the fourth Earl of Gainsborough, private chamberlain of Edward and George V. and former attaché at the British embassy at Washington, died Aug. 27. He was 43 years old.

The Soldiers Settlement Board, which has handled the placing of returned men on the land will be incorporated in the Land Settlement Board in the Department of Immigration, reports Hon. Robert Forke, minister of immigration and colonization.

For having set fire to a stack of hay containing about 32 loads belonging to his employer, a young man named Montrose, a recent arrival from the Old Country, was sentenced at Winchester, Ont., to serve one year in the Guelph reformatory.

The University of Toronto, conferred its highest honor, the degree of Doctor of Laws, honoris causa, upon Rt. Hon. Lord Hewart, former Lord Chief Justice of England, at a special convocation in Convocation Hall, Toronto.

Between 250 and 300 people have been killed and more than 2,500 injured in less than 18 months past as a result of religious conflicts between Hindus and Moslems in various parts of India, Lord Irwin, the viceroy, stated in addressing the legislative assembly at Simla.

John B. Simpson, a British scientist, has left Edinburgh, Scotland, with the intention of making his home in an iceberg for three months. He was accompanied by a St. Marys dog. "My purpose," said Simpson, "is to gather material for a book on the ice fields."

Used by physicians—Minard's Liniment.

Wickham—"Do you know anything about wax lengths?"

Myers—"Sure. Half the stations are on one and the other half are on the other two."

Buildings lined with wood are better for reproducing sound than those with wall of other material.

King's Job Not Envious

Everything Mapped Out For Months Ahead Makes Life a Drudgery
There is no doubt that the strain of the daily life of the King and Queen, with every waking hour mapped out for months ahead, is much greater than the public realise. Everyone collected with the Court comments on the splendid health and spirits which the Queen always enjoys. The King is now and then fatigued, but she is never.

There is no harm in repeating a somewhat pathetic comment of the King on his own drudgery in fulfilling, as he does, so scrupulously and good-humoredly, the truly tremendous programme laid almost daily before him. Visiting the Lord Mayor of London the other day, whose life during his year of office is, as everyone knows, a veritable slavery, the King remarked: "You have to do this for twelve months but I have been doing it for sixteen years."

Motor Exhaust Kills Tulips

Famous Dutch Flowers Die In Gardens Of Paris

The famous tulip gardens have bloomed for the last time. They are victims of the exhaust of automobiles in the blue de Paris. The bulbs were presented to the city of Paris by Dutch growers five years ago, and were planted in the Tuilleries gardens, an ideal setting for their masses of gorgeous colors. But each year they have dwindled and it was found that the prevailing westerly winds blew on to them a low wave of sulphuric gas from passing automobiles, affording an additional proof of the deleterious effect of the growing number of automobiles on the atmosphere of Paris.

A Chic Blouse and Separate Skirt

Extremely smart is the blouse shown here, having two points at the lower front edge, set-in pockets, and long or short sleeves extending into the neck. No. 1641 is for misses and small women and is in sizes 16, 18 and 20 years. Size 18 (36 bust) requires 2 1/2 yards 36-inch material for bodice top. Price 20 cents the pattern.

The skirt, having two box-plaits in front and gathers at the back, is joined to a bodice top. No. 1349 is in sizes 16, 18 and 20 years. Size 18 (36 bust) requires 1 1/2 yards 36-inch material and 3/4 yard 26-inch lining for bodice top. Price 20 cents the pattern.

The designs illustrated in our new Fashion Book are advance styles for the home dressmaker, and the woman or girl who desires to wear garments dependable for taste, simplicity and economy will find her desires fulfilled in our patterns. Price of the book 10 cents the copy.

"The wonder metal of the age" is a fitting term for Aluminum. Its lightness, brightness, freedom from rust, and many other good qualities, make it a container par excellence for good tea—Red Rose Tea is packed only in this modern metal package.

Would Help Aviators

Towns Should Show Their Name Readable From Air

British aviation authorities say the time has come for English towns to erect big signs with the names of the town visible to casual aviators, who hop the Atlantic now with the simplest of navigation instruments and big scale maps.

The request of Edward F. Schlee and William S. Brock, in the Frigate of Detroit, that the inhabitants of the little South coast town of Heaton spell out the name of the town and country on the beach sand so the fliers would know what country they had reached, will go down in history as one of the strangest questions ever asked in England.

Diarrhoea Summer Complaint HE ALWAYS USES

Mr. T. F. McGregor, McLennan, Alta., writes:—"Over forty years ago my mother used to give us Dr. Fowler's Extract of Wild Strawberry for diarrhea and summer complaint. All through the years since then when troubled with an excessive looseness of the bowels I have been accustomed to take a few doses of the same old, reliable remedy and it always seems to have the desired effect, no matter what the cause."

Don't Accept a Substitute
The valuable preparation has been on the market for 80 years; put up only by The T. Millburn Co., Limited, Toronto, Ont.

Energy From the Sun
The time is near, says Charles F. Kettering, New York inventor, when the energy of the sun will be put directly to work instead of storing it up in coal and oil deposits and using it as now is done. Uncounted billions of potential horsepower are going to waste each day, he says, because the sun's rays are not used.

Miller's Worm Powders prove their value. They do not cause any violent disturbances in the stomach, any pain or peevishness, but do their work quietly and painlessly, so that the destruction of the worms is imperceptible. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and a cessation of manifestations of internal trouble.

Cop to victim of wreck — "Why did you try to cross the tracks? Didn't you know the 415 was due?" Brown— "Well, but this is the first time for years that it was on time."

Adversity sometimes transforms a coward into a hero.

Witness Centenary Celebrations

Mr. Ashby and C. E. King, from Uxbridge, England, returning home on the Cunard liner Asafoa from Montreal after a visit to Uxbridge, Mass., where they witnessed the centenary celebrations, and Uxbridge, Ont.

SUNDAY SCHOOL LESSON

SEPTEMBER 11

SOLOMON DEDICATES THE TEMPLE

Golden Text: "I was glad when they said unto me, let us go unto the house of Jehovah."—Psalm 122:1.

Lesson: 1 Kings 8.
Devotional Reading: Psalm 122.

Explanations and Comments

1. The Great Procession With the Ark and the Tabernacle, verses 1-5.—It was during the Feast of Tabernacles, which began on the fifteenth of the seventh month and lasted seven days (Lev. 23:34), that the elders of Israel and all the heads of the tribes brought up the ark of the covenant out of the city of David, which is Zion. "Both the House of Commons and the House of Lords were present, as we would put it, for the elders were the chosen representatives of the people, and the princes of the fathers' houses were the hereditary leaders. In addition there was a vast attendance of the rank and file" (H. C. Gillette). Two processions advanced from different directions. One came from Gibeon and bore the sacred tabernacle with its gold and silver coverings and boards of acacia wood, and all its holy vessels—the golden altar, the golden candlesticks, the table of show-bread, and the brazen serpent. On Mount Zion this procession joined the other which bore the ark away from its temporary tent erected for it in Jerusalem by David. As the two processions proceeded to the temple, Solomon and a great congregation with him sacrificed a host of sheep and oxen. "The road was flooded with the streams of blood. The air was darkened and scented with the clouds of incense; the songs and dances were unintermittent. Onward the procession moved up the slope of the hill. It entered court after court of the temple. It reached the Holy Place" (Stanley). By this lavish sacrifice Solomon was honoring God in the best way known in those days. It was a primitive method of saying that God and people so unite to the honor they would show Jehovah.

"There is something repulsive to us in this sacrifice, but there is a noble side to such carousals of slaughter. Barbaric it may be, but devotionally also. Before we blame them, we have to be ready to give as freely in our purified, higher way to the service and worship of God"—H. C. Gillette.

A Power Of Its Own.—Dr. Thomas' Electric Oil has a subtle power of its own. All who have used it know this and keep it by them as the most valuable salve available. Its uses are innumerable and for many years it has been prized as the leading salve for man and beast.

Mining Men Go To Europe

Will Investigate Treatment Of Coal For By-Products In Germany

Hon. Carlos Stewart, minister of mines, and Dr. Charles Cannell, deputy minister have sailed for Europe. Mr. Stewart is one of the Canadian Government representatives to the League of Nations conference at Guggen.

After the sessions of the League he and Dr. Cannell will visit many of the industrial centres of Germany and England for the purpose of investigating the progress made in the past few years in the treatment of lignite and bituminous coal for by-products in Germany.

Producers in Germany claim that they can secure oil from coal at a less cost to them than crude oil.

WILSON'S

Will kill many times more flies for the money than any other fly killer. Each pad will kill flies all day, every day, for three weeks. At all Grocers, Drugists and General Stores—10c and 25c per package.

Borden's ST. CHARLES MILK

Make the Penalty Fit the Crime

Proposal Made That Whipping Be Added To Jail Sentence For Stealing Cars

Whipping with a strap person convicted of theft of motor cars is one of the amendments to the criminal code proposed in the report of the Canadian Bar Association's committee on administration of justice.

The report was presented to the association at its annual meeting by Judge F. Coatsworth of Toronto.

Judge Coatsworth urged immediate legislation by the Dominion and provincial parliaments to incorporate in the criminal code the important amendments suggested in the committee's report.

Concerning the penalties for auto theft, the committee recommended that instead of the present one year sentence provided by the code, the penalty be two months' imprisonment with a whipping in the second month with a strap instead of a cat-o-nine tails.

The committee also advised provincial legislation for supervision of persons let out on suspended sentence; for a system of parole, and for "effective dealing" with all the feeble minded and mentally afflicted both when in court and in confinement.

Why suffer from corns when they can be painlessly rooted out by using Holloway's Corn Remover.

The farthest north radio station in the world is one just established by the Soviet government on Cape Desire, in the Arctic Zone. It is intended for communication with Arctic explorers.

A blush is one of the few things that cannot be counterfeited.

Pains in the Back

Thoroughly massaged with Minard's backache will disappear.

ANTI-SMUGGLING PLANS DISCUSSED AT WASHINGTON

Washington.—The Royal Canadian Customs Commission left for home after holding four formal meetings and several informal meetings with state, customs, consular and prohibition authorities here. It was permitted to look into the workings of the United States anti-smuggling machinery. It investigated the efficiency of the United States customs system in general and three or four branches of the system in particular. It received some suggestions from the United States authorities for improvement of conditions along the border. The commission will take all these things into consideration while it is preparing its reports to the Canadian Government after the close of the Ottawa session.

The commission while in Washington confined itself strictly to inquiry into procedure in the United States and any negotiations for a change in existing agreements between Canada and the United States will be instituted later on by the Government's department.

Little information has been given out as to what actually happened at the conference here, but in unofficial talks with newspapermen, United States officials have let it be known that they are working towards tightening up of the 1923 anti-smuggling treaty between Canada and the United States. Assistant Secretary of the Treasury, Seymour Lowman, in charge of customs and coastguard patrols, announced that the border patrols would be increased from 500 to 600 men in the Buffalo-Lake Itasca district, and proposed that the United States would greatly increase the number of its coastguard vessels on the Great Lakes if the smuggling of liquor by this route could be stopped. It is known that United States would like Canada to establish her own equal agents in this country. The commission no doubt has been told that this would make it easier to prevent smuggling both ways and that consular certificates would go far toward eliminating fraudulent invoicing and double invoicing, which methods are now being used to cheat the Canadian Government of revenue.

Noted Explorer Is Slain

Reported That Members Of German Expedition To Interior Of China Are Massacred

New York.—The New York World says Dr. Wilhelm Pilchner, former staff officer of the Imperial German Army and noted explorer, and all of the members of an expedition he was leading, have been reported massacred by natives in the western part of Szechuan province, China. The World's wireless station picked up a German trans-Atlantic wireless press message to the effect that a British resident of Shikha in the northern part of India, just south of Tibet, had reported that Pilchner and his party had been killed.

New Laying Record

Saskatchewan Barred Plymouth Rock Hen Is New Champion

Saskatoon.—A Barred Plymouth Rock hen owned by the University of Saskatchewan has made a new record for egg production.

Completing her pullet year, this new champion has to her credit a total of 329 eggs in 365 days. Not only is this a new record for Barred Plymouth Rocks, but as far as is known it is a new record for all heavy breeds of poultry.

This bird was bred and raised by the poultry department of the University. She is known as H.3102.

Poultry Congress a Success

Ottawa.—It is now stated by those who had charge of the "United World's Poultry Congress," held in Ottawa from July 27 to August 4, that it was a greater success than even its sanguine promoters predicted. Forty-two countries sent delegates and live birds numbering 5,500. There were birds from the poultry farms of King George, the Prince of Wales and various reigning monarchs of Europe.

W. N. U. 1927

Popularity Of Lindbergh

Seven Million Dollars Involved In Business Offers Since He Made Famous Flight

New York.—Charles A. Lindbergh has had \$1,000,000 by going through a real marriage ceremony in front of a movie camera and \$5,000,000 more by accepting the business offers tendered him since he made his non-stop trans-Atlantic flight, says Commander Fitzgibbon Green, the "Honeymoon" chief secretary, in a popular science Monthly.

Commander Green, who has completed a check up on mail and other communications to Lindbergh, says that among the 3,500,000 letters and 60,000 telegrams and cables received, were at least three proposals that the young flier join in an attempt to reach the moon by rocket shot from the earth. Lindbergh also received thousands of proposals of marriage. The aviator's mail included also 14,000 packages.

Lindbergh's post, sent in his mail numbered 5,000 and upwards of 100,000 was received in return postage. More than 500 "close relatives" asked him to "do something for them." More letters came from women than from men and letters from girls outnumbered those from boys four to one.

Col. Lindbergh answered many of the letters in longhand, but thousands found their way to the waste basket.

New Doukhobor Leader

Son Of Former Leader Leaving Russia For Canada

Yorlton.—Peter Verigin, now leader of the Doukhobors, second son of the former leader of the Doukhobors, in Canada, leaves Moscow September 2, for this country, according to word received by a prominent member of the Doukhobor colony near Yorlton. He will sail from Southampton on the Berengaria for New York September 10. Permission for Mr. Verigin to leave Russia was extremely difficult to secure from the Soviet Government. Negotiations to this end have been under way ever since the death of his father in a railway accident two years ago, and many obstacles had to be overcome. Mr. Verigin will be accompanied by Paul Ivanovich Blazgoff as travelling companion.

Makes Altitude Record

French Aviator Attains Height Never Before Reached By Man

Paris.—Aviators intent on breaking the world's altitude record must climb higher than 42,554 feet in consequence of the feat of Jean Calizot who topped his own record by almost 1,700 feet. Calizot's former altitude record was 12,442 metres and the new mark is 13,000 metres.

"Never again," I don't want to fall off the earth," exclaimed the diminutive Frenchman when informed that he had attained a height never before reached by a human being.

Would Control Flights

Washington.—Rigid control of all future trans-oceanic air flights will be insisted upon by the National Aeronautic Association which announced that while it disclaimed any desire to discourage "individual initiative in the quest for new records" it would demand fitness of flying equipment and competence of personnel as indispensable conditions to sanctioning such flights.

Sugar Industry For B.C.

New Westminster, B.C.—Arrangements for the establishment of a beet sugar industry in the Fraser Valley by an English company, capitalised at \$5,000,000, have been completed, according to word received by the New Westminster Board of Trade. The company will acquire a large area in the Fraser Valley, worked by English and Scotch labor. The plant, it is believed, will be located in New Westminster.

Drink More Milk

Minneapolis.—Mrs. Ella Hoole, Brooklyn, was re-elected president of the National Women's Christian Temperance Union, in annual convention here. Milk drinking has increased 27 per cent and ice cream consumption also has gained since prohibition went into effect, said Miss Ella A. Marshall, Chicago, in an address before the convention.

GOOD CROP NOW BEING GARNERED IN PRAIRIE WEST

Ottawa.—Canada is in a fair way to garner another good crop, says a report issued by the Department of Agriculture based on reports submitted by the superintendents of the Dominion Experimental Farms. The survey includes wheat, coarse grains, potatoes, hay and forage, apples, tobacco, sugar beet, and turnips and covers all the provinces.

The wheat producing provinces of Western Canada are referred to separately in the review. In Alberta it is stated very heavy yields are indicated in all parts of the province. No frost or rust damage is in evidence. Cutting is well under way in the South and just started in the central part of the province. A bumper crop in the Peace River region is indicated. "In fact," says the report, "the province, as a whole, seems to be ready to harvest a hearty record crop of good quality wheat."

Cutting is general in Southern Saskatchewan, but just beginning in the more Northerly parts according to the review. In Saskatchewan some injury has been done by frost and rust but this is not likely to cause any great damage. On the whole, prospects in Saskatchewan are for a very good crop with yields somewhat above the average. With respect to the Manitoba wheat situation the bulletin states that about 40 per cent of the wheat crop has been cut in the Southern part of the province and promises to be up to average.

In Central Manitoba, the crop is heavy and is being injured to some extent by rust. In the more northerly parts the crop is rather late and may be affected by rust and frost.

The wheat-crop in Quebec and Eastern Ontario will be about average, it is stated. In Western Ontario it is considerably better than last year.

Ship Cream To England

Quebec.—The Provincial Department of Agriculture announces that its experiments, conducted in co-operation with the Development Branch, Canadian Pacific Railway, in the shipping of sweet cream to England, comprising four separate consignments, have been entirely successful. The cream arriving in uniformly good condition. Now that the possibility of this new development has been demonstrated it is expected that commercial interests will enter the field.

Human Fly Robs Hotel

Los Angeles, Cal.—A human fly burglar descended from the roof of the hotel at Elks club by finger and toe holds, entered the rooms of five sleeping guests through the windows, and obtained \$200 in cash and jewelry valued at \$15,000. Detectives said imprints made by fingers and toes in the dust of window ledges were their only clue.

"Fore" Replaces War Whoops

Were the staid old chieftains of the past to sit up in their graves and watch this young chief driving from the eight to ten on the Banff Golf Course, there is no saying whether they would grin or frown or with approval. Chief Big Buffalo, who is seen about to drive, thinks they would be envious and would bump their fate at having to sleep on while their grandsons sent whistling drives over stretches that once echoed with their war whoops.

Public Opinion Against War

Increased Participation Of The Masses In Peace Movements

Vancouver.—Increased participation of the masses of the people in formulating the attitude of nations toward each other was given by Sir George Foster, in addressing the Canadian Club here, as one of the forces operating against war. He cited as an example that not long ago "war seemed possible between the United States and Mexico, but that immediately the chance of conflict became known people from all parts of the country protested to Washington. He said the history of negotiations before other conflicts showed that decisions were made on the prejudices of a more handful of people.

"Read the negotiations which occurred before the last war and note the few persons who participated in them," he said.

Sir George spoke of "The New Internationalism." He said the most stupendous accomplishment in all history was the fact that the peoples of 62 nations had formed themselves into an association of nations to devise new methods of carrying on relations.

Complain About

History Books

Report Says Text Books Used In Chicago Are Pro-British

Chicago.—Historians used in Chicago public schools were indicated as anti-American, pro-British, and "grossly distorted" in an exhaustive report filed with Mayor Thompson.

John J. Gorman, former congressman who was commissioned by the Mayor to investigate the text books, said he found they omit facts and distort and minimize many of the real characters, events and ideals hitherto held sacred to American history.

The report came fast on the heels of the suspension, under charges of insubordination, of William McAnulty, superintendent of schools, whom Mayor Thompson has assailed as "the stool pigeon of King George" and the instigator of alleged anti-American teaching in the schools.

No Increase In Immigration

Ottawa.—According to the Department of Immigration, June brought 15,052 newcomers to Canada as compared with 12,191 in June of last year—an increase of 45 per cent. The total for the first quarter of the fiscal year was 77,434 compared with 45,403 for the same quarter of 1926—a gain of 60 per cent. Of the June flux 7,272 were British, 2,642 were from the United States and 5,138 from other countries.

Asked To Appear In Movies

London.—King George and Queen Mary have been asked to appear in a "speaking movie," which will be shown in London this month in connection with the admiralty's full dress film reconstruction of the battles of Coronel and Falkland. The talking pictures are expected to be the sensation of the year.

GERMAN ENTRANT IS WINNER OF THE MARATHON SWIM

Lake St. George, Toronto.—Four miles and four and a half hours ahead of his nearest rival, Ernst Vierkötter of Germany crawled across the finish line to victory and a cash prize of \$50,000 at the Canadian National Exhibition—21-mile marathon swim through icy cold Lake Ontario waters. Vierkötter's time was 11 hours, 53 minutes and 25.2 seconds, a record for the distance.

Georges Michel of France, huge conqueror of the English Channel, finished second to collect \$7,500. Both men swam strongly, not showing any visible sign of great fatigue as a result of the long and terrific swim from morning until night, after ploughing their way to the close from 200 starters in one of the greatest sporting events ever staged on the North American continent. Michel's time was 16 hours and 12 minutes, using an easy trudgeon stroke.

Nearly a quarter of a million people welcomed Vierkötter while several thousand waited the intervening hours to greet the second prize winner who swam a 12-mile distance.

William Erickson of New York, the "foater," was the last to finish, but owing to withdrawals took third place in the prize list. His time was 18 hours and 55 minutes.

Report Labor Increase

Data Shows Gain In Prairie Provinces

Regina.—The Labor Gazette reports that in the prairie provinces last month the greatest gains in employment were in construction, manufacturing, transportation service and communication, while logging—in which the movement was seasonal—showed a decline. Data were compiled from 775 employers with an aggregate staff of 118,556 workers, as against 112,998 in their last report. This increase of 4,558 workers exceeded that registered on July 1, 1926, while the level of employment was higher than on the same date in any other year of the record.

Alleged Spies Arrested

Leningrad, Russia.—The political police have arrested an alleged group of 26 spies, charged with espionage in behalf of the British intelligence service in Finland. Most of the accused, including several women, hold various positions in the army, navy and civil service, and are alleged to be in charge of a British naval captain with headquarters in Finland.

Under Royal Patronage

Calgary.—The Alberta Wheat Pool is now under Royal patronage, the announcement being made in the current issue of the U.F.A., the official organ of the United Farmers of Alberta. It announces Prof. W. L. Carlyle, the manager of the E.P. Ranch, on behalf of H.H. the Prince of Wales, had signed a pool contract covering 1,000 acres.

Has Population Of Million

Montreal.—In the preface to the annual report of 1926, which has been published and distributed by the city treasurer, are found statistics concerning Montreal which show it to be one of the nine largest cities on the North American Continent with a population of 1,000,000.

Saved Millions For Employers

Detroit, Mich.—James Everett Smith, steel expert of the Ford Motor Company, died Monday after a long illness. Smith saved the company \$26,000,000 in four years by use of a new method to harden steel, according to a statement written by Henry Ford in his autobiography.

Huge Sum For Defense

New York.—The seven year vain struggle to save Sacco and Vanzetti from death in the electric chair came to a statement totalling more than \$250,000, Alvin Karpis, treasurer and founder of the Boston Defense Committee, announced here.

Thirty per cent of American men and 61.3 per cent of the women are total abstainers, an estimate shows.

The Forgotten Island of Romance

1—The Settlement at Tristan da Cunha. 2—The only access to the sea. 3—Canadian Pacific Empress of France.

Interest on both sides of the Atlantic
has recently been aroused by the
gracious solitude of their Majesties
King George and Queen Mary of
England for the welfare and comfort
of the least-known and loneliest island
colony in the world.

Romance blows with the wind
from every solitary island; and the
romance of Tristan da Cunha is its
grandeur of isolation, the struggle for
existence of the few inhabitants of
its rock-bound shores and the ex-
periences of a sailor who left
as a heretic to the island the
belief that somewhere amid the rocks
to be found a wealth of pirate
treasures. The island is distant from
its nearest neighbor, St. Helena—
Isle of Napoleonic memories—by
1500 miles and is far from the path
of ships, rarely indeed receiving a
visit from the great and busy world
beyond the horizon; a world which,
marching along the highway of pro-
gress, has all but forgotten this out-
post of civilization in the desert of the
South Atlantic Ocean.

In 1816, during the war with Great
Britain, an English garrison occupied
this strategic island. There they
found three Americans one of whom,
Jonathan Lambert, "of Salem,"
the citizen and mariner thereof, is
reputed to have sailed the seas as a
buccaner. As a pirate he ran untried
to form someone escaping the yard
arm and public hangings that have
been their traditional fate. The story
goes that he came to Tristan in order
to board, in a secret place, the booty
of many a rich prize, seized and

plundered on the roaring Spanish
Main.

Thus the place is invested with the
magic spell of a Treasure Island, and
to this day, the islanders believe that
within its bounds is to be found a
rich hoard of doubloons, moidores,
pieces of eight or louis d'or. Whether
this be true or not, Lambert, when
found by the English, was engaged in
the peaceful occupation of preparing
the skins and oil of seals, with which
the shores abounded. These were
exchanged for provisions with any
passing ships; and the trade appears
to have been so lucrative, that Lam-
bert was encouraged to issue a pro-
clamation, inviting all the world to
trade with the island. Of it Lambert
declared himself the sovereign lord,
"grounding" as he is claimed to have
said, "my right and claim on the
rational and sure ground of absolute
occupancy."

The continuous occupation of Tris-
tan da Cunha began, however, in
1817, when, on the withdrawal of the
garrison, William Glass, of Kuba,
a corporal in the Royal Artillery, was
at his own request left on the island
with his wife and two soldiers who
had been induced to join them. The
real discoverer of the island was a
Portuguese navigator whose name
the island bears. This was in the year
1806.

From the tiny settlement founded
by Glass, which was increased from
time to time by shipwrecked mariners
and a few settlers from Cape Town,
and diminished again by the exodus

of the more restless ones among them,
the present colony of 140 souls has
sprung.

The people are self-governing and
self-supporting. The men are daring
sea-men and clever carpenters and
masons; but there is a touch of the
primitive about the picturesque
bullock-carts, and the cottages built
of huge blocks of stone.

Physically the island is entirely of
volcanic formation. High cliffs circle
the lonely spot and are pierced with
ravines, the walls rising like ramparts
from the sea, to a height in many
places of over 1000 feet high. They
are topped by a central cone that
stands out amid the surrounding
cliffs at a height of 1640 feet, snow-
capped and symmetrical as the Peak
of Tenerife. Here, in the largest
crater, is a fresh-water lake, which,
it is said, is never frozen. On the
northwest of the island is the sole
access to the sea—a narrow plateau
where is the only settlement.

The social life of the community is
limited and the monotonous existence
of the inhabitants has resulted in
some of the colony drifting off beyond
the horizon on some chance merchant-
man. The island, however, will soon
experience the joys of radio for early
in 1928 the Canadian Pacific liner
Empress of France on its first African
American cruise will stop near this
island enroute to Cape Town, when
powerful sea and many other gifts
from American and Canadian pas-
sengers will be handed by a raft, for the
use and comfort of the islanders.

Here and There

Air mail service between Win-
nipeg and Fargo, North Dakota, has
been inaugurated and the first mail
for Winnipeg from the United
States arrived recently.

The potato acreage along the
Dominion Atlantic Railway line is
larger than last year and a 40 per
cent. crop increase is looked for.
There will likely be 175,000 barrels
available for export, as compared
with 132,000 last year.

British Columbia's farms produced
\$71,302,209 last year; breaking
all records and gaining \$6,208,696
over the previous year, according to
the final figures of the Provincial
Statistics, G. H. Stewart, Lum-
bering leads with agriculture second.

A new world record is set—300
white L. ghorn baby chicks arrived
from the University of British
Columbia at Ottawa through the
Canadian Pacific Express Company,
safe, sound, and hungry, all of
them. None had fed on 175,000 water on
their 8,000 mile journey and none
died or suffered.

A Barred Plymouth Rock, owned
by the University of Saskatchewan,
has established a new record for the
three Prairie Provinces, laying her
300th egg in her pullet year of which
there is still a month to go. The
world's record for trap-nested
production is held by No. 6, an
Araucana, B.C. pullet, which laid 351
eggs in 384 days.

Members of the newly-appointed
Saint John Board of Harbor Com-
missioners, headed by Hon. W. E.
Foster, recently conferred a confer-
ence with Canadian Pacific officials
of Montreal in connection with the
proposed improvement of the grain
shipping facilities of the port. The
chief object of the new commission,
according to Mr. Foster, is the creat-
ing of a national idea of an All-
Canadian trade route through the
Port of Saint John.

Scots in Car da are looking for-
ward with keen interest to the
coming Highland Gathering and
Festival of Scottish music to be held
at Banff September 3 to 5, the ac-
tivities taking place on the grounds
adjoining the Banff Springs Hotel.
Through the generosity of the Cana-
dian Pacific Railway officials this
festival has been made possible and
is along the line of the Canadian
Folk Song Festival held at the
Chateau Frontenac, Quebec, in May
which was voted such an outstand-
ing success.

The United States' interest in the
development of the locomotive in
Canada is seen in a request by the
Baltimore and Ohio Railway to the
Canadian Pacific Railway to send one
of its latest passenger types of
engine to the centenary exhibit of
locomotives which will open at
Baltimore on September 24th. The
Canadian Pacific has arranged to
supply one of its latest types of the
"2500" class locomotives, complete
with crew, for the occasion. This
is the company's fastest and most
powerful passenger locomotive.

One of the strangest attempts at
taking a census is now being made
by Andrew Widdens of Bella Coole,
B.C., according to information re-
ceived here. At the request of
Harlan I. Smith of the National
Museum of Canada, Mr. Widdens
is taking a census of the grizzly bear
population of some eleven valleys
along the fjords which are included
in the "Norway of America" tra-
versed on the steamship journey
between Prince Rupert and Van-
couver. The coast line between
these two ports is a noted big game
hunting spot and attracts many
grizzly hunters each year from all
sections of the continent as well as
from other parts of the world.

SHIP YOUR GRAIN TO McBEAN BROS.

The Old Reliable Firm Of

Write us for information regarding the markets. We will say now that so far as we can see the World's conditions warrant high prices for this year's crop, and if your wheat is handled intelligently you can see no reason for the farmers taking less than \$1.50 a bushel, and possibilities are for a great deal higher price. The big shortage in the corn crop in the United States is a very bullish factor for our coarse grains. Give us a trial. We are licensed and bonded. Reference: Bank of Nova Scotia.

PAINTED FIRES

BY NELLIE L. MCCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER VII.—Continued

Every seat in the courtroom was filled. It was not every day, such a thrilling case can be offered to the unemployed public. A young girl, pretty and well-dressed, found in a Chase don't with heroin taint in her possession, who resisted arrest, fighting like a wild cat, injuring an officer, and now refusing to say a word, is no ordinary attraction.

The gallery, reserved for the purpose, swarmed with anxious spectators. There was going to be a great show. Men with blue-black whiskers showing through the skin of their faces; and black shirts with a button or so gone, disclosing hairy chests; weedy youths, plainly of face; stoop-shouldered older men with velvety noses and heavy-lidded eyes; and to the butt, like old clowns; expectant women, excited and strident; the boudoir-cap type, hungry for sensations to fill idle days; fast dwellers, bargain hunters, can-opener, secure in their law-abiding virtue, they came crowding in, hungry-eyed and jostling. Their liberty was sweet to these women this morning when contemplating the prospect of another woman's possible loss. It gave them that pleasurable thrill of comparative virtue.

The Press table was full. It looked like a heart interest story, a real thrill stuff—lovely, but misguided youth.

Heim's case was the first called. The police matron brought her in and sat with her. Her face was pale, but there was no shrinking or fear in her eyes, and the eager crowd, whose eyes were all fixed on her noticed that she anxiously searched for someone. Her friend would have come if she were well enough, Heim thought, and again her attitude against the fate which prevented her from carrying out the very first favor her dear friend had asked her to do. She would know, though, that it was through no fault or carelessness of hers. Maybe she had died for lack of that medicine they had taken away from her. Maybe her dear friend had died—and there was no one who could ask. She must not ask—that was the

trouble in her heart as she faced the crowd with his hundred eager searching eyes.

Under a glass roof, suspended by chains from the ceiling, sat the magistrate, alert, eager. He would see if the Finn girl would refuse to answer questions. He would put something of the fear of the law into her. These Finn girls! He knew them; hadn't he had enough trouble with them?

The police officer gave evidence and identified Heim. The one with his arm in a sling told his story. "The girl appeared to be very frightened, and did not understand that she was arrested. Your Worship?" I think," he said.

"I am not yet convinced that this girl does not understand English," his Worship snapped, "that is a point to be decided, and she can save herself a lot of trouble now if she will tell us the whole story."

"What is your name?" The interpreter spoke to her. "Heimi Milander," she answered.

"Yes, that name is well known in this court—I had the pleas—paternal duty not long ago of sending Anna Milander to jail for a similar offence, attacking a policeman. Have you a sister named Anna Milander?"

When the interpreter put the question, Heim admitted that she had but not knowing what the magistrate had said, she did not know the implication. The interpreter did not give her all that he had said.

All Rodgers was on her feet in a moment. "Your Worship—" she began.

The magistrate ordered her to sit down. "I demand to be heard," said Miss Rodgers, "an injustice is being done this girl."

"All in good time," said the magistrate sternly. "You will get a chance to speak, but you cannot interrupt this court."

There were murmurs in the gallery. "Served her right to be set in her place!" "Gee doesn't the magistrate know how to handle a case. No one can put anything over on him."

The plump face of Rodgers was having a positive thrill. They floated over Heim's pale face with its proud defiance. She would get jail, sure as she was sitting high and when she came out she couldn't pull that stuff on them. Girls just out of jail were not so uppity; they were glad to have anyone show them around. They nudged each other.

"Now, I want you to speak," the magistrate said slowly, and speaking in a long-drawn-out voice. He seemed to think if he spoke loudly she must understand. "You are either an old hand at this business, young and innocent as you look, or you are hiding someone. You must speak. Just say the name of the person who sent you to Sam's for dope."

Again the interpreter spoke to her, and the crowd waited.

"The spell broke at that, and the gallery relaxed. A rustle of whispers cracked over it, like a gust off dry leaves.

"Silence!" commanded the magistrate, and again the listening came in the court. The air was heavy now with unwashed humanity, perspiring feet, bad breath, scented soap. Outside, wagons rattled by, street cars clanked.

"Has any person anything to say?" asked the magistrate, looking wrathfully at Miss Rodgers, who came forward.

"Give your name," commanded the magistrate sternly, "and be brief."

"This young girl has lived in our neighborhood for three months and is a good character," said Miss

Rodgers. "She belongs to a girl's club, which she attends regularly; she has no bad habits, and is steady and industrious. She is an innocent, healthy, normal girl. It was not her sister whom you sentenced. She has no relatives here. Her sister is in Finland."

"She belongs to a girl's club," does she?" the magistrate seemed to bite the words off. "Well, I'll tell you and her, for I believe she understands every word, that I don't believe in girls' clubs or women's clubs either. Women and girls have too much liberty these days, and that's why they are going to the devil. They don't work any more—they just gad around to picture shows and get into trouble, and the women's organizations encourage them instead of trying to restrain them. The old-fashioned girl stayed at home and worked with her mother. But now the mothers are out reforming the world, and the girls are on the street or in their clubs. I blame the club women of this city for the devilment that goes on among the young people, for the home has gone. I tell you, there's no religion in the homes any more, no respect for law—nothing but debauch control clubs, political clubs, bridge clubs, while the young girls and boys steal cars, joy ride and snuff dope. There you are!"

"The cliff dwellers were enjoying it. They did not belong to the women's organizations, so he didn't mean them. Mr. Terry came forward and asked if he might give evidence.

"This girl's mother, cannot be blamed," he said, "she is dead. There has been here only a few months. If our society is in the state you say—" "Give your evidence, Sir," interrupted the magistrate. "This is a court of law—you are not preaching, remember."

"The girl is doing an honorable thing," continued the minister. "She is suffering for some other person's misdeeds. She must have gone to Sam's place for someone. I know the girl; she is honest and innocent."

"Let her speak then. No one is stopping her. Let her clear herself."

"It would be an iniquitous thing to send this girl to jail, where she will associate with evil women. I plead for mercy. She struck the policeman in her fright, she says so, too."

The crowd in the gallery were restless. They resented the preacher's coming into the play. The modern preacher who comes bodily into question without apology is a jarring note in the conventional philosophy of their class. They had much the same conception of a preacher as the magistrate had. Preachers should be sinning, tea-drinking, bazaar-appearing, curates, pallid and dandruff, with decayed teeth.

(To Be Continued.)

Eskimos Grateful To Dentist

Do Not Mind Having Teeth Pulled Says Professor Waugh

Eskimos like to have their teeth pulled, says Dr. L. M. Waugh, professor of orthodontia in the Columbia school of dental and oral surgery, in a report sent from the Labrador coast, where he is carrying on researches with the Eskimo tribes in Northern Labrador and the Ungava Bay region.

"Eskimos make grateful patients when their confidence is once gained," states Dr. Waugh, "and extraction brings smiles instead of wry faces."

After he had extracted teeth from a group of Labrador Eskimos, including four women and five men, they smiled and thanked him, and all said that "it didn't hurt at all." Dr. Waugh indicates that this attitude is characteristic of all his Eskimo patients.

"Hurrah! I'm going to have a holiday tomorrow!" "Wife—Good! You can clean the cellar and the attic."

"Have any person anything to say?" asked the magistrate, looking wrathfully at Miss Rodgers, who came forward.

"Give your name," commanded the magistrate sternly, "and be brief."

"This young girl has lived in our neighborhood for three months and is a good character," said Miss

Rodgers. "She belongs to a girl's club, which she attends regularly; she has no bad habits, and is steady and industrious. She is an innocent, healthy, normal girl. It was not her sister whom you sentenced. She has no relatives here. Her sister is in Finland."

"She belongs to a girl's club," does she?" the magistrate seemed to bite the words off. "Well, I'll tell you and her, for I believe she understands every word, that I don't believe in girls' clubs or women's clubs either. Women and girls have too much liberty these days, and that's why they are going to the devil. Little Helps For This Week

For I reckon that the sufferings of this present time are not worthy to be compared with the glory which shall be revealed in us—Romans viii. 18.

But all through life I see a cross. Where soon of God yield up their breath. There is no gain except by loss. There is no life except by death. There is no vision but by faith. Nor glory but by bearing shame. Nor justice but by taking blame. And that eternal passion said. "Be emptied of glory and right and name."—Walter C. Smith.

The prime condition of a life ever found is a life ever lost. But there are times when we all feel poor and bare and sad for our losses, and wonder whether it was not all wrong when the treasure was taken away. If we are poor because we stand true to life and duty, we are poor only in the sower is poor, because he has to cast his wheat into the furrow and then wait for the sheaves of harvest. Our poverty then is our wealth, and our loss our gain.—Robert Collier.

BABY'S OWN TABLETS

—HELP A PRIZE WINNER

Baby's Own Tablets are without an equal for little ones. From the newborn babe to the growing child they are an absolute safeguard to health. Once a mother has used them she always gets no other medicine but Baby's Own Tablets.

Among the mothers who state that Baby's Own Tablets are the best medicine for little ones that they know of is Mrs. Russell Hill, of Norwood, Ont. Her experience with the Tablets should be of great benefit to any mother who has not already given them a trial. Mrs. Hill says: "I have five fine healthy children, and from the youngest to the oldest they get no other medicine but Baby's Own Tablets. When our baby girl was eleven months old she won second prize at the Norwood Fair, and when she was a year older she won first prize in competition with twenty other babies. It was the Tablets that gave her the health and development to carry off these prizes. I always get better results in telling other mothers what the Tablets have done for my children."

Baby's Own Tablets are sold by medicine dealers, or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The Danger Of Forgetting

British Empire Through Modesty Losing Sight Of Accomplishments

Lord Haig rendered a service to the Empire by his presidential speech at the conference of the British Empire Service League. It was high time that some one should speak out boldly and frankly about the magnificent accomplishments of the Empire in the Great War, the unprecedented burdens it shouldered, not only on its own behalf, but on behalf of the whole of civilization. Our incorrigible habit of belittling our own efforts and applauding those of our neighbors has in this instance been carried a good deal too far, both for our safety and our self-respect. It has allowed the propaganda of nations not true in self-satisfaction to convince the world that it was they, and not we, who bore the main burden—a fact that is exceedingly damaging to our name and reputation abroad. But the damage does not end there; for the truth is that with our own overdone modesty and the overdone claims of others, we have ourselves begun to forget the glory of the part we played.

"Have you any cheese?" "Yes, we've got some nice cheddar cheese."

"Oh, but we don't live in a cottage any more. We live in a nice apartment house now. Have you any cheese fit for that sort of place?"

Minard's Liniment cures sore feet.

ALLOCK LAIGHT & WESTWOOD

69 KING ST. WEST TORONTO

Says Prince Can Stand It

The King does not believe the Prince of Wales is leading too strenuous a life, is the report of a conversation which Harry Wright, an officer in the Morecambe Corporation, had with His Majesty near Lancaster, as told in the Weekly Dispatch. "They talked about the Prince, and when Mr. Wright ventured the opinion that he was working too hard, the King said: 'He is a young man, and can stand it. Of course, he is fond of travel, as young men always are, but when they get a bit older they are not as fond of going abroad, are they?'"

It's hard to mend a ball break in your conversation.

Do You Cough?

Photo by Kennedy

Quebec, Ont.—"I caught a severe cold and could not seem to get rid of it. It took chills to me and finally settled in my bronchial tubes causing me a lot of trouble. The cough would be more severe at night than during the day, causing sleeplessness. I finally decided I would try Dr. Pierce's Golden Medical Discovery and by the time I had taken one bottle I was entirely relieved of the bronchial trouble—my cough disappeared. I have had no trouble with a cough since. I do not think a person can take anything better for bronchial weakness or deep-seated coughs than the Golden Medical Discovery."—Miss Mary Duggan, 170 Ontario St.

TO WOMEN OF MIDDLE AGE

Mrs. Wilson's Experience a Guide to Women Passing through the Change of Life

Hamilton, Ontario.

"I have taken several bottles of Lydia E. Pinkham's Vegetable Compound and I cannot speak too highly of it as I went through the change of life and was all run-down and had no appetite and sick, and the pains in my back were so bad I could hardly move. I felt very sad and times and thought I had not a friend on earth. I did not care if I lived or died. I was very nervous, too, and did not go out very much. A friend advised me to try a bottle of Lydia E. Pinkham's Vegetable Compound, so I did. I am a farmer's wife, and always worked hard until lately, and was in bed for two months. I began to feel like a new woman after the first bottle and I recommend it with great success, also Lydia E. Pinkham's Liver Pills. I am unwilling to answer letters from women asking about your medicine, as I cannot speak too highly of them."—Mrs. Emma Wilson, 471 Wilson Street, Hamilton, Ontario.

Sold by druggists everywhere.

For Economical Transportation

3 years from today
You Will Know

YOU would require three years of arduous day-to-day driving to know as much about Chevrolet performance and endurance as the General Motors Proving Grounds brings out in a few months.

There's strength—stability—ruggedness built into every inch of the Chevrolet Chassis; into its beautiful body by Fisher; into every detail of its powerful engine.

After years of trouble-free driving, you will know that Chevrolet has added to its economy, its smoothness, its power and its Beauty, the greatest measure of Strength and Endurance ever possessed by any low-priced car. Ask your Chevrolet dealer for a demonstration.

SUMMERFIELD & MAYER.

Stony Plain and District.

Meredith Bros. made a shipment of cattle yesterday.

John Knebel of Strathcona, a former resident of Stony, paid the town a visit this week.

Commissioner Bryn gave the local A. P. Police detachment the once-over, on Monday.

Attention is drawn to the announcement in another column regarding the supply of electric current in the daytime, from the local power house.

About two dozen motors became ditched along the Base Line, following the heavy rain storm Saturday evening, giving the wrecking crews from the local garages a very busy time.

Mr Tyrkalo, one of the pioneer farmers of Blueberry district, has a fine new residence in course of erection. Contractor Carl Mayer has the job in hand.

A large crowd of neighbors and friends were present Saturday night at the barn dance at the Shuster ranch. Golden Spike. Good music had been provided, and all had a good time.

The cutting of grain is well advanced in this district at present, and with favorable weather most of it will be in the stock by the end of next week. The yield is running up to expectations.

The second edition of Mr J W McAllister's Press Bulletin on "Winter Egg Production" may be secured free of charge from the Dept. of Extension, University of Alberta.

A Rear-seat Driver.

Another accident happened Monday evening on the Baseline, between Stony and the Grove, when car No. 69958 driven by Mr E Linden, of 117 street, Edmonton, collided with Chevrolet No. 65728, owned by a resident of Stony. Each car was pretty well shaken up, the damage to the Stony car including a bent front axle.

An eastbound car had become stalled on the road, and Mr Linden, also east bound, tried to squeeze his auto past the standing obstacle, in front of the oncoming westbound car, but failed to make it, with the result he struck the westbound car on the left fender. It would appear the man-at-the wheel was taking orders from the navigating officer on the rear seat.

The cars were taken in to Sommerfield & Mayer's garage, for repairs.

Wheat Pool News Notes.

The E P ranch, owned by H.R.H. the Prince of Wales, has been signed to a Wheat Pool contract. The ranch contains a section of land, near High River. The Prince was a recent visitor at the ranch, and while there instructed his manager, W L Carlyle to have the acreage placed under a Pool contract.

The first sample of this year's wheat to reach Alberta Pool office was from the crop of O Lindgren, Strone. It is an excellent No 2 Northern weighing 55 lbs. to bushel. Mr Lindgren has 80 acres of this wheat, and is a member of the Wheat Pool.

Spruce Grove News

"Soutty" is on the water wagon—again.

Mr Bill Litke has gone to Evansburg.

Mr O'Brien, who has had charge of the Gillespie elevator here for a short time, is leaving next week for his old position. His place here will be taken by Mr Sleam, from Dynant.

While truckman Morrow was taking in a load of steers to Edmonton Stockyards for Butcher McKeen, one of the animals jumped out of the truck while it was proceeding along Jasper avenue, and was found near Winterburn several days afterward, heading for its former home.

The dance in the Highway Pavilion last week was a great success, the floor being well filled with dancers, and the Martin orchestra giving the usual good program of music. Another of these popular dances will be held in the near future.

Toward the close of the big dance last week, a Stony Plain Luthario anxious to leave town was backing out his gas chariot from the kerb and gave her too much gas, with the result he bumped into a limousine taxi from the City and broke all the windows on the port side. But, worst of all, he broke the slumbers of the drowsy Jehu, who promptly demanded an explanation—and reparation. When this was forthcoming Bill hiked westward, and the now mollified chauffeur returned to his enveloping robes to finish his siesta.

Ray's Best Joke.

Traffic Cop—What's your name?
Truck Driver—It's on the side of me wagon.

Cop (trying to read name)—It's obliterated.

Driver—Yer a liar; it's O'Brien.

Stony Plain, Sept. 6, 1927.

AUCTION SALE BILLS

WELL GOT UP AND PRINTED AND ADVERTISING, TOO, ARE ESSENTIAL IF YOU WISH YOUR SALE TO BE A SUCCESS. BRING YOUR LIST TO THE STONY PLAINS SUN

Accident Near the Grove.

Another accident happened east of the Grove, at the corner of the St Joseph's church, Monday noon, when a young bicyclist from the City named Hugh Wendall of 72d street was knocked from his wheel and rendered unconscious.

He and a fellow-wheelman were heading west, and on crossing the intersection did not notice a car coming from the north, driven by Mr Ripley, a farmer of the district.

The car and bicycle collided, and the rider was thrown over onto the left fender of an auto driven by Mr M Turlock of Dunfield, which was proceeding eastward on the Baseline. The wheel was badly wrecked.

The injured youth was taken care of, and shortly after removed to an Edmonton hospital by a returning City man.

The police were notified. Constable Smith responded, and made an investigation.

AUCTION SALE OF TIMBER BERTH COVERING DOMINION LANDS.

THE RIGHT to cut timber under license on Berth No. 4182, comprising the following lands in the Province of Alberta, will be offered for sale at public auction, at the upset price of \$3,792.00, at 2 o'clock P.M. on Wednesday, the 6th day of October next, at the office of the Agent of Dominion Lands at Edmonton.
